Dear friends,

Welcome to the Campus School and Junior College! Become a part of the Vision and Mission of the Campus School of IIT Bombay. Welcome to the vibrant premises of the Campus School where you will find a number of curricular, co-curricular and extra-curricular activities waiting for you.

The Campus School and Junior College is a great place to enjoy your school days, participating in a variety of extra-curricular activities of your choice and develop your personality, acquire new skills in art and craft, sports, music and drama, public speaking and much more.

The School promises the development of all facets of your brain, your mind and gets you ready for professional courses of your choice. If study is your focus the diligent and dedicated teachers will take you through the curricula of every grade. And with the NEP around the corner the School is set to make the necessary changes to deliver to you the goodness of the New Education Policy.

What is more, the education is highly subsidised for children on the IIT Campus. So it is a great proposition to study in the Campus School paying much less than Schools outside or even the Kendriya Vidyalaya! And being affiliated to the Maharashtra State Board presents everyone an opportunity to learn the local language and Culture, in line with similar Schools on IIT Campuses all over the country.

Over the years, many successful Alumni of the Campus School have had very fond memories of their school days. And you too can be an Alumnus of the Campus School of IIT Bombay!

Best wishes,

Prof. P. P. Date
Professor,
Mechanical Engineering Department,
Associate Chairman,
Campus School and Junior College,
IIT Bombay.
Dear Young friends, parents, and well-wishers,

Campus school started its journey almost half a century ago with the goal to serve the IITB campus community. In this journey, the school, along with the KG School and Junior college, has fulfilled the promise by graduating thousands of students, making them invaluable members of the society. Today our alumni are successful in their chosen field. They are established and happy in their lives and spread all over the world.

With time, the school has not only broadened the ambit of students that it serves, but it has also continuously changed its structure to meet the current needs and societal demands. As a result, the Campus School is a vibrant place where students learn with joy. We put every effort to make the learning process an enjoyable experience for young minds. We also take every precaution against mindless drudgery. The school takes special care to develop the soft skills of our students with regular workshops and training. The effort is reflected through our various co-curricular activities and achievements.

We are also committed to maintaining the school a safe place where bullying and harassment have no place. We pay special attention to the psychological needs of our young students. We sensitize the staff members, students, and parents via various workshops and counseling.

All of these were possible to achieve due to the passionate hard work of our teachers and non-teaching staffs. While we take pride in the commitment of our staff members, teaching and non-teaching alike, we are not complacent in our pursuit of excellence. We know that the sky is the limit, and we promise to go even beyond.

Best Regards,

Prof. Abhijit Mujumder
Dear friends,

It is a privilege to be associated with the Campus School and Junior College - an important educational enterprise in the heart of the vibrant academic-space of IIT Bombay.

As we face the uncertainties of the present, the Campus School and Junior College re-commits itself to its best traditions and accomplishments. At the same time, it also seeks to re-invent and re-fashion itself in order to meet new challenges and launch new aspirations.

The dedicated and wonderful staff of this institution are engaged not only in building effective classroom practices, but also in creating an expansive, stimulating environment for free-spirited enquiries and intellectual adventures. The Campus School and Junior College has a rich convention of welcoming a great diversity of students into its fold. It strives to be a space where these diversities and differences are cherished and valued; where children work and play joyously; where they discover wide-ranging talents, interests and passions; where they fine-hone values, skills and dispositions—all of which will allow them to flourish even after they leave the gates of this institution.

Besides ensuring effective teaching-learning and empowering children to be learners-for-life, this institution is also propelled by the ambition of shaping holistic human beings who will work to establish an equal, just and free society.

In a few short years the Campus School and Junior College will be celebrating its 50th anniversary. As we approach this momentous occasion, we re-dedicate ourselves to upgrading infrastructures, innovating technologies of learning, fostering an enabling milieu, maximising opportunities and, above all, to creating a social ethos marked by mutual respect, loving-kindness and democratic well-being.

Your Partner in Education,

Prof. Sharmila
Dear students, teachers, parents and all community members,

We have completed 45 years of serving the IIT community and to mark this proud occasion, we announce the first issue of our e-magazine, srijan.

It has been our constant Endeavour to achieve all round development of our students. This includes going beyond the prescribed curriculum and opening up their minds- to view, to explore, to pursue, to develop and most importantly to create.

We announce the magazine to further our aim of ensuring maximum participation with articles from students and staff alike. Who would say that a majority of these contributions were sent in at a time when the pandemic ensured minimum or no contact between the students and staff. I am happy that in the midst of chaos, we learnt to put technology to use for the benefit of our students.

I look at the contributions and am proud to present the articles, drawings and various write ups our students have poured their hearts into or found fit to share with their peers. I would like to eventually see them move beyond contributions and become a part of the editorial team to enhance their decision making abilities, i.e. learning by doing. I hope that students will make the most of this opportunity.

Happy Reading!
Dear All,

It brings me an immense pleasure to bring out one more issue of ‘SRIJAN’, the school magazine of IIT CAMPUS SHCOOL AND JR COLLEGE, after a long time.

All of us know that the values like kindness, love, generosity, freedom are fully filled in the hearts of children. The efforts to give way to all these treasures should be the motto of every institute and its educators. IIT Campus School & Junior College has always tried its best to bring forth the creative art of our budding talents. It was unusual situation before us when we started working on the issue. We had a very less contact with the children. Still, the Editorial Board tried its best to reach out the children and the result is before you.

You will see a variety of poetry, riddles, drawings, paintings, and some informative and inspirational writings from students and teachers. Hope all of you will enjoy reading. And one more thing, don’t forget to give your feedback to help us improve in our next attempt of bringing ‘Srijan’ before you.

MY FIRST DAY IN SCHOOL AFTER LOCKDOWN

Sneha Santosh KP 10th STD.

Starting a new school year is always full of emotions and especially during a pandemic. This October, the start of the school year seemed more overwhelming than ever. One could observe the mixed feelings of excitement, joy and confusion among the students’ parents and teachers at public schools. Early morning on the first day of the school, students began gathering in the garden of Sagarejo’s Public School. While it is not mandatory for the students to wear the masks, many of them including the youngest were voluntarily covering their faces. This was not done solely for the purpose of hygienic protection but also to demonstrate students’ awareness about covid-19. After many weeks of distance learning which was challenging for children, parents and teachers alike, the willingness to go back to normal learning process is now, demonstrably high; everyone displays a readiness to comply with the new safety regulations set by the Government.

All the standard safety procedures are observed as children enter the school building: they pass a disinfection barrier, a thermal screening and the sanitization. These procedures delayed entrance to the classroom, so children have to be at school 30 minutes earlier ensuring timely arrival for their first lessons.

Although hand sanitizers are installed throughout the building, teachers also encourage the children to go to the restroom and wash their hands after each lesson. The first day back in the classrooms was unusual emotional for both students and teachers. Wearing a mask which is mandatory for teachers make their jobs physically harder due to strained breathing. Masks also cover their emotional expressions requiring students harder to focus and understand the information teachers are conveying.

The first lesson for all students was dedicated to share more information about covid-19 and related safety regulations. Children were also introduced to their daily schedules. First graders were overwhelmed by their first day at school. However, these feelings had been present with or without covid-19. The first graders’ parents believe that their children’s feelings towards school depend greatly on developing an uninterrupted routine in school attendance. Some parents think that distance learning could ruin the children’s overall understanding of the school and moreover can damage their mental health.

Both parents and children are happy to be back at school and do not wish to return to distance learning. They say that they are ready to follow all the regulations set by the authorities. Eighth grade students emphasize how important it is to be physically present in the classroom to interact with friends and to share opinions about different subjects with each other and with their teachers.

Readiness and enthusiasm of the parents, children and administration to adopt to the new set of in school rules makes the safe management of the learning process possible during the the covid-19 reality.

“I am happy to return to school. Distance learning was hard, working with the computer caused pain for one’s eyes and fingers. I could understand the online classes, but it was
easier when we had face to face meetings with the teachers. One more thing I am happy about is to see my friends, meet new teachers. If the lessons were distance again, we won’t have a chance to get introduced with teachers.”

Don’t remind me about online lessons. Going to school is cool. There are many changes though; you can’t hug the teachers, they always wear masks, hugging friends is not allowed either, but we violate this rule sometimes. Breaks are shortened and we have to wash our hands many times. Also you are not allowed to lend something to others. I am carrying water in the bottle as water dispensers are turned off. Still it is good to go to school. We are repeating the material of the previous year and understand everything better in offline classes than on the online lessons. We have a new game called “coronabana” it is like the game of catch.

“I didn’t have a personal computer and was attending online lessons from a mobile phone. We had to either write the homework in the workbook and then send the photo of it or type it on the keyboard. Sometimes there were technical problems with internet or electricity and we were missing the lessons. Now we will cover those materials too. I am happy to return to school, it was boring at home and also miss my friends and I am hoping to see them”. “Yes, I am happy to return to school it was boring at home I am playing or reading books. In school there will be more positivity and better learning process”. It was a different thought. Our class was split into half. We wore masks and maintained physical distance and we could not play and “go crazy”.

When we turned back to distance learning I was very upset I am not able to communicate with friends and miss them. The software is always loggy doing the lessons. I can’t hear the voice well. When everyone starts to talk together, I get tired and turn off the software. We again have to sit at home to avoid getting infected by corona.
दीये तुम जलाओ

EXPERIENCE OF ONLINE AND OFFLINE CLASSES

Vidisha Gamre, 8th STD

My Experience of Online Classes -

It is that few students join in the class because some students do not have a phone. I don’t understand anything in online classes. Some students have internet and Wi-Fi issues and some have issues of phones. Some students have problem of joining classes because of brother and sisters’ classes. In class, teachers also sometimes have the issues of internet and Wi-Fi. Sometimes teachers’ are also not audible.

My Experience of Offline Classes -

In offline classes, teachers teach face to face and I think offline classes are better than online. Because in offline class students can understand what teachers teach. When the government order came to open the school, I felt good because I like to go to school. The good thing is that all students come to school and in online class some students do not attend classes. I ate breakfast during online classes and I do not even open my text book in the class. Students chat so much that is ‘yes’ Mam, ‘Ok Mam’ in English, Maths classes. In online classes, some students chat a lot like my notebooks are incomplete. But in offline class my notebook is always complete. In online class so many times, students take their phones even when the class is over that’s why their parents get angry. In online class, I don’t understand any thing because sometimes the teacher’s voice breaks because of internet issues or Wi-Fi issues. In offline classes, I understand and I like to go school. In online class, I feel very bored. In offline I like to go to school because the face to face classes. Teachers are good and experienced. I like offline classes more than online as in PT periods, students can play while in online it’s not possible. I like offline class but some periods are good in online mode too.

Ms. Gauri Kale - VI std.
ROMEO AND JULIET

Avantika Bhamble 8th STD.

Romeo and Juliet is the most famous love tragedy written by William Shakespeare. This is a story of love and fate. Furthermore, the basis of this tragic love story is the Italian tale translated into English in the 16th century. The story is about two young star crossed lovers whose death results in reconcile between their feuding families. Moreover, Romeo and Juliet is among the most frequently performed play of Shakespeare.

Lesson of love from Romeo and Juliet, first of all, Romeo and Juliet teaches that love is blind. Romeo and Juliet belonged to the two influential families. Furthermore, these two families were engaged in a big feud among themselves. However, against all odds, Romeo and Juliet find each other and fall in love. Most noteworthy, they are blind to the fact that they are from the rival families. They strive to be together in spite of the threats of hate between their families. Another important lesson is that love brings out the best in us. Most noteworthy, Romeo and Juliet were very different characters by the end of the story than in the beginning. Romeo was suffering from depression before he met Juliet. Furthermore, Juliet was an innocent and timid girl. Juliet was forced into marriage against her will by her parents. After falling in love, the personalities of these characters changed in positive ways. Romeo becomes a deeply passionate lover and Juliet becomes a confident woman.

Life without love is certainly not worth living. Later in the story, Romeo learns that his beloved Juliet is dead. At this moment, Romeo felt heart broken. Romeo gets extremely sad and drinks poison. However, Juliet was alive and wakes up to see Romeo dead. Juliet then immediately decides to kill herself due to this massive heart break. Hence both lovers believed that life without love is not worth living.

Legacy of Romeo and Juliet-

Romeo and Juliet is one of Shakespeare’s most popular plays. Furthermore, the play was very popular even in Shakespeare’s life time. Scholar Gary Taylor believes it as the 6th most popular of Shakespeare’s plays. Moreover, Sir William Davenant of the Duke’s company staged Romeo and Juliet in 1662. The earliest production of Romeo and Juliet was in North America on 23rd March 1730. There were professional performances of Romeo and Juliet in the mid 19th century. In 19th century America, probably the most elaborate productions of Romeo and Juliet took place. The first professional performance of the play in Japan seems to be George Crichtons Milns Company’s production in 1890. In the 20th century, Romeo and Juliet became the second most popular play behind Hamlet.

There have been at least 24 operas based on Romeo and Juliet. The best known ballet version of this play is Prokofiev’s use Romeo and Juliet. Most noteworthy Romeo and Juliet have a huge impact on literature. Romeo and Juliet made romance as worthy topic for tragedy. Before Romeo and Juliet, romantic tragedy was certainly unthinkable.

Romeo and Juliet are probably the most popular romantic fictional characters. They have been an inspiration for lovers around the world for centuries. Most noteworthy the story depicts the struggle of the couple against a patriarchal society. People will always consider Romeo and Juliet as archetypal young lovers.
GEOMETRY IN DAILY LIFE

Avantika Bhamble Std. 8

Geometry is an ancient science and an important branch of mathematics. The ancient mathematician Euclid is credited as the father of geometry who used the word formally in his book elements. It is derived from the old Greek world metatron meaning measurement. For the middle school students it is all about different basic shapes including their names, properties and formulas related to their areas and volumes. But modern geometry is diverse much more from these basic concepts. But none of these have changed their existence and applications in daily life and it still reflects in our everyday experiences.

APPLICATION OF GEOMETRY IN EVERYDAY LIFE:

Geometry is the most influential branch of mathematics. A keen observation will give you many examples. It was tougher in ancient era hence its impact on life it also wide it is a practical life its application begin long back during Egyptian civilization. They use geometry in different fields surcharge in our measurement and architecture glorious temples places dams and bridges are the result of this in addition to construction and measurements it has influenced many more fields of engineering biochemical, modelling, design, computer graphics and topography.

We do a lot of tasks daily that involve Geometry. Some of the common applications include the measurement of a line and surface area of the land, wrapping gifts, feeling of box and tiffin without overflow shapes used for different sign boards. A person with good practical knowledge of geometry can have himself to measure the dimensions of land without a change of concepts. Other advanced applications include robotics fashion designing computer graphics and modelling. For example, in fashion designing, a fashion designer has to know about different shapes and their symmetry for or developing the best design. Few examples that are cited here. So do we need to study geometry.

SLOGANS OF LIFE

Manish Chaudhary, 10th class

* Always smile to form your life worthwhile.
* Life is not what you are living, but its all about how you are living.
* Always smile and pass it two other; it is a basic rule of joyous life, my brother.
* Life is getting with challenges that usher in your tons of changes.
* Pleasure and pain for consecutive; it is up to you whether you allow it over or leave it.
JOURNEY OF STUDENT LIFE

Palak Singh 8th STD

Contribution of school and teachers to a student’s life is the best part of a life. Students learn many things from books, but they have to enter the real world after a student life is over. So they need practical knowledge of things. Students life leads to live a successful life. In fact student life is a life of learning. Students learn morality and good manners. They understand the value of discipline in life. So student life is a period of making and preparation.

Student life is a carefree life. It is a life of joy. A student is free from all the cares of the world. He gets a different exposure in college. He takes part in games and sports. He goes sometimes for picnics and sometimes on educational trips. The school and college life of students is a small world. It is therefore a golden period of life.

Student life is a life of discipline. At home, student may behave well or badly. But they are memories that last forever.

SLOGANS (QUOTATIONS) ON BACHPAN

Piyasi Chakraborty, 11th STD.

There is nothing like the life of childhood.

I just think the day I spent in childhood was really a memorable and wonderful life which pulls me now always to my past.

Childhood memories are the best of all other memories in our life.

Was it problematic, to amplify!?
Was it cheesy, to show up!?
Was it easy, to give up!?
It was as it was, cause if it wasn’t if wouldn’t....
STOP GLOBAL WARMING

KUNAL GAWLI, 8TH STD

Global warming is a serious threat to the earth causing many harmful effects on the environment and the ozone layer [which protect Earth from harmful sun rays]. The first reason for global warming is deforestation. Many trees get cut. They clean the air. This leads to global warming. To reduce the effect of global warming people those who cut trees should replant new trees, in stead to maintain balance. The second reason for global warming is garbage. Overuse of plastic bags cause global warming. We must reduce using the pack things. We should use the things that can be recycled. The last reason for global warming is fossil fuels. Fossil fuels are burnt for engines. If we do not burn the fossil fuels, we will not have the global warming. smoke from the factories, industries and mainly nuclear plants cause global warming. It is not the problem one country but countries all over the world. Smoke needs to be stopped. It means no more fossil fuels to be used. We need to make more fuel efficient vehicles and find other ways to make power. If we use everything in the proper way, we can reduce global warming and earth will be saved and better place to live.

TREES SUFFERING LIFE

Palak Anil Singh

Trees are our wealth on planet Earth. We depend on trees for over sustenance. We depend on trees for the oxygen that keeps us alive. Our food too comes from the trees. They maintain the ecological balance in our ecosystem. On the earth, not only men but all life form depend on trees. If we cut all the trees, we put the lives of all life form at peril. Do we want to endanger life on our planet? Not at all. We want to save our planet and all life form. So we need to protect our trees. we all need to come together in the cause of saving trees around the world. A Green World is a safe world for all of us.

Trees are useful and beautiful gifts of Nature. Forests help in maintaining the ecological balance which is so essential for preservation of life on this earth. Existence of man on the earth therefore, depends on forest. Carbon dioxide released by man is used by trees while the oxygen released by trees is useful for man’s life. Therefore both trees and men are independent.

STORY OF OUR CITY VADODARA

Kashish Solanki 10th class

Vadodara is situated on the bank of the river Vishwamitri [whose name is derived from the great Saint Rishi Vishwamitra]. The city was once called Chandravati, after its ruler Raja Chandan, then Viravati, and then Vadpatra. From Vadpatra it derived its present name Baroda or Vadodara.

Sayajirao Gaikwad was the Maharaja of Baroda state from 1875 to 1939 and is not notable; remembered for reforming much of the state during his rule. He belongs to the Royal Gaikwad dynasty of Maratha which ruled some parts of present Gujarat.

Vadodara is the third largest city in Gujarat. Initially it was known as Baroda. It is the administrative capital or headquarters of Baroda district. The city is famous for Laxmi Vilas palace and excellent architectural specimen. It is also the place for the Maharaja Sayajirao University of Baroda [Vadodara], the largest University in the state.

Vadodara is known as Industrial City and also a home to celebrate ganad festivals which attracts foreign tourists too. The city is an important place of industrial, educational and cultural centre in India. It has its own airport and the international terminus was built in 2016. Vadodara is one such City which has managed to keep touch with its roots. Overlooking the banks of river Vishwamitri, the town of Vadodara was once known as The Heart of Banyan tree.

OBSTACLES IN YOUR PATH

Satyam prabhavale 10th standard

In ancient times, a king and his men placed a huge rocks on the road way. He then hid in the bushes and watched to see if anyone would move the rock out of the way. Some of the kings wealthiest merchants and courtiers passed by and simply walked around it. Many people blamed the king for not keeping the road clear but none of them did anything about getting the stones removed. And so it happened that one day, a peasant came along carrying vegetables. Upon approaching the rocks, the peasant laid down his work done and tried to push the rocks out of the way. After many pushing and straining, he finally manages. When the peasant went back to pick up his vegetables, he noticed a purse lying in the road where the rocks had been. The purse contained mini gold coins and a note from the king explaining that the gold was for the person who removed the rock from the road. You see in life every obstacle that we come across gives us an opportunity to improve our circumstances, and while the lazy complain that other will create opportunities through their kind hearts, generosity and willingness to get things done. So see, every problem is an opportunity and a chance to become better and to grow.

STORY OF RAPPER

A 15 year old girl gave birth to a child in 1972, 17th October in America. She doesn’t know that her son will change the rapper world in future. After couple of months, the boy’s father left both, the mother and the son and never returned. After that both of them struggled to survive. Years passed, the mother worked and the boy went to school. He often switched schools every 2-3 months. It made him difficult to make friends and stay out of trouble. He failed at the 9th grade three times. Then finally dropping out, he said he was not interested in school. Because all he wanted to do was rap. Because of these words his mother drove him out of the house. In school also he was not happy because all the children bully and hurt him and his mother was drug addicted. So finally he started to work in a restaurant. At the same time, he was finding way to become a rapper. It was too hard to become a rapper. As a white man because hip-hop community used to be black rapper, refused to white man. So he started to rap in the clubs because of some friends’ advice. But that one also failed! So so he decided to suicide, even suicide also not gave a hand to him. So he again started to work hard for his success. After so much of struggle and hard work, he released his first debut album infinite [1996] but it was damn flop for him. But he never gave up. He forced himself to exertions for his success. Then, he released his second album, the Slim Shady EP in (1997) which was noted as the faster selling album in rap history. After so much of struggle, brutality and pain, he changed and surprised not only rapper world but even all the black and white people. Because nobody know that white man can rap this much. Now he is not only rapper but he is record producer and an actor who is known as one of the most controversial and best selling artist of the early 21st century and his name is Eminem.

HOPE   STRENGTH   BELIEF

Raj Shingare 10th STD

'I promise to never lose hope',
These words will get you through,
When you feel you cannot cope,
When you’re low and feeling blue.

I’m proud of being me’
Say this every day,
When the tunnels light is hard to see,
When you think you’ve lost your way.

I’m stronger than i know’
This you must believe,
Follow you are dreams, don’t let go,
When you feel you can’t achieve.

Now read it from bottom to top.

Dedication

Sahil Gaikwad 10th class

We tempted to have dreams of luxury
But desires contribute more dignity.
When we seek of price, but it delay
Patience requires most dedication.

In crisis like this we more prevalent
But heard the unwilling tones.
We greed but doubt the achievement
We faint, collapse when destiny runs.
Riniam Sichiang
WONDERS OF WATER
Shruti Wankhede

Water is necessary for your body to digest and absorb vitamins and nutrients. It also deoxygenates the liver and kidneys and carries away waste from the body. And when it comes to digestion, water is an important ingredient. Fibre alone cannot aid proper digestive function by itself.

DRINKING WATER AND WEIGHT LOSS
Water is a natural appetite suppressant, so developing a good water drinking habit can be a long-term aid in achieving and maintaining healthy weight. It’s also important to remember that when the body is dehydrated, fat cells get “rubbery” and cannot be easily metabolized. This means that it is harder to lose weight when you don’t drink water.

WATER AS A CURATIVE FOR ILLNESS
Water is also an important “healing tool” for people with history of kidney stones. Since water dissolves calcium in the urine, drinking at least 8 glasses of water daily reduces the risk of stone formation. Drinking water is also valuable in preventing urinary tract infections in both men and women for flushing impurities out of the system.

Even mild dehydration makes you more susceptible to viruses. When your body is dehydrated, the mucus formed due to allergies and cold doesn’t stick and collect in your throat and lungs. Even cold sores that appear on the lips are minimized by drinking water.

It is important to remember that we are a water machine as 90% of the blood in our body is made up of water. Clean and pure water intake ensures and elevates level of health, so reach out to the best and the most inexpensive health drink.

PURIFICATION OF WATER
75% of our body is made up of water! It is essential that the water ingested is clean, safe and pure as contaminated water leads to waterborne diseases. Purified and safe water handling can minimize the risk. Effective methods are either through boiling or e-boiling. Water should be boiled at 100 degrees Celsius for 20 minutes to get rid of germs. Proper care must be returned while cooling and storing; otherwise recontamination can occur. Another method is e-boiling, which is fast and convenient. The purity of water can be electronically monitored. Regulated doses of ultraviolet rays in the UV chamber, e-boil water is an instant making it completely pure and safe to drink and use.

बचपन की याद
वर्ष २०२२-२३ रोहित मुस्तुड़ २रीं
(इंटरमेट - संस्कृति)

वह बचपन आज याद आता है....
वह स्कूल ना जाने का बहाना
और जाने पर घटना आंधू बहाना
वह पेसिल का खो जाना
और दूसरों की रबड़ चुरना
आज याद आता है....

वह जरा-सी बात पर झगड़ना
और गलतियों पर "बेवगी" पड़ना
वह धूप में राहिकल चलाना
और घर आकर बीमार पड़ जाना
आज याद आता है....

वह पैसे चुरकर वीडियो गेम जाना
बड़ी सी टीवी पर मारियो कूदना
वह दोस्तों संग मेला जाना और
कूलहड़ बर्फ को खाना
आज याद आता है....

Ayush Jadhav - IV std.
A soldier is a person who protects our country from enemies. He is courageous enough to fight and face all kinds of dangers and difficulties. A soldier is a fighter. He loves his country and is ever ready to sacrifice his life when needed. In India, a soldier is called as Jawan and he is the backbone of the army. He leads a hard and tough life. Soldiers are healthy, strong and active people. A soldier may either belong to the Army, the Navy or Airforce. He has to undergo tough training program to become a soldier. Soldiers are well-trained for any situation they might have to face while protecting the country. The sole purpose of a soldier is to protect our country from internal and external enemies and fight for the nation. They are well trained to use various kinds of weapons and aircrafts, climbing mountains and swimming deep seas. They are taught to survive in the toughest conditions. Soldier has to be on duty for long hours. He lives away from his family and hardly gets to meet them once or twice in a year. He makes history important which immortalises him.
Vallabhbhai Patel, in full Vallabhbhai Patel by name Sardar Patel (Hindi “Leader Patel”) was born on October 18, 1875 at Nadiad in Gujarat and died on December 15 1950 at Bombay, now Mumbai. He was a Barrister, a statesman and one of the leaders of the Indian National Congress during the struggle for Indian independence.

During the first three years of Indian Independence after 1947, he served as a Deputy Prime Minister, Home Minister, Minister of Information and Minister of States. Patel was born into a self sufficient landowning family of the Leva Patidar Caste.

Reared in atmosphere of traditional Hinduism, he attended Primary School at Karamsad and High School at Petlad but was mainly self-taught. Patel married at the age of 16, matriculated at the age of 22 and passed the District Pleader Examination which enabled him to practice law. In 1900, he set up an independent office of District Pleader at Godhra and two years later, he moved to Borsad.

As a lawyer, Patel distinguished himself in presenting unassessible cases in a precise manner and in challenging police witness and British Judges. In 1908, Patel lost his wife who had borne him a son and daughter and thereafter remained a widower. Determined to enhance his career in the legal profession, Patel travelled to London in August 1910 to study at Middle Temple. There he studied diligently and passed the final exam with high honours.

Returning to India in February 1913, he settled in Ahmedabad, rising rapidly to become the leading barrister in criminal law. The Ahmedabad Bar revered him and was noted for his style, superior mannerism, his smartness, English style clothes and championship in Bridge at Ahmedabad Fashionable Gujarat club. He was, until 1917, indifferent to Indian political activities.

In 1917, Patel found the course of his life changed after having been influenced by Mahatma Mohandas Karamchand Gandhi. Patel adhered to Gandhi’s Satyagraha (policy of nonviolence) in so far as it furthered the India’s struggle against the British. But he did not identify himself with Gandhi’s moral convictions and ideals and regarded Gandhi’s emphasis on their universal application as irrelevant to India’s immediate political, economic and social problems.

In 1928, Patel successfully led the landowners of Bardoli in their resistance against increased taxes. His efficient leadership of the Bardoli campaign earned him the title Sardar (Leader) and henceforth he was considered practical, decisive and even ruthless, and the British recognised him as a dangerous enemy.
WHY GOD MADE TEACHERS

Iqra Shaikh 10th class

When God created teachers,
He gave special friends
To help us understand His world
And truly comprehend
The beauty and the wonder
Of everything we see,
And become a better person
With each discovery.

When God created teachers
He gave special guides
To show us way in which to grow
So we can all decide
How to live and how to do
What’s right instead of wrong,
To leaders so that we can lead
And learn how to be strong.

Why God created teachers
In his wisdom and his grace
Was to help us learn to make our world
A better, wiser place......

MATHS RIDDLES

Kunal Gawali 8th STD

1. I am an odd number take away a letter and I become even. What number am I?
2. What’s more a pound of iron or a pound of feathers?
3. If it takes 6 people 9 hours to build a barn, how long would it take 12 people to build the same barn?
4. A woman has 7 daughters and they each have a brother how many children does she have?
5. Which is correct 9 and 5 is 13 or 9 + 5 is 13?

Ans- 1. Seven 2. Both same 3. None, barn is already built. 4. Eight 5. None
MY FIRST DAY IN SCHOOL AFTER LOCKDOWN

Bhumi Thorat 8th standard

Today was my first day in school after lockdown. I was going to school after 2 years. I was so excited to go to school. I was going to meet my friends and teachers after a long time. Yesterday, my best friend called me and excited to meet me and so my other friends and my teachers also. So yesterday, I went to do some shopping for my school. I had bought new school dress, tiffin box, school bag and some stationery items like notebooks, textbooks, pen, pencil etc.

When schools were closed, the government had started online classes facilities. Online classes need electronic devices like mobile phones, laptops etc. But I noted that in online class there were only 11 to 20 students. But the total sum of the students in class is 38. Once, I met one of my friends in the market. And I asked her, “Why did she not attend online class?” Then she told me that she did not have mobile phone, laptop. I felt so bad for her. So I and my friend decided to find out the solutions for the students who did not have electronic devices. From that day, we all friends meet at a spot and discuss what we have learnt in online classes.

But now there are offline classes. I and my friends were very happy. When I entered in the classroom, I saw it was fully changed. Paints on walls, benches, and blackboard were changed. But there was one more problem, all teachers and students were wearing masks. So, we all can’t see each others faces. There is social distancing. We all are sitting far apart. But now we can learn online and offline also. I was very much bored sitting in front of mobile phone screen. This was my experience in school first day which I have shared through this write up.

THINGS YOU MIGHT NOT HAVE KNOWN ABOUT JUSTICE LEILA SETH

Alok Ubale 10th std

Justice Leila Seth, the first woman Chief Justice of High Court in India died at the age of 86. Justice Seth known for her ‘punctuality’ was credited with many firsts in her career spanning five decades. She had many qualities that might just surprise you. She was born in Lucknow to an engineer of the railways in 1930. Justice Seth was a Pioneer in almost every step she took died of Cardiac Seizure at about 10.28 p.m. on 5 May 2017 (aged 86). Shantum Seth the second of her three children said, “She is survived by her children and her husband Prem Seth as per her wishes her body will be sent to scientific research”.

Here are 10 facts about justice Leela set.

1. She was the first woman Chief Justice of a State of High Court in the country. In 1991, she served as the Chief Justice of Himachal Pradesh.
2. The famous judge was also, the first woman judge in the Delhi High court.
3. Not just that she was also the first woman to top the London bar exams back in 1958.
4. The eminent jurist’s entry into the career in law was just by chance. In her autobiography, she reveals how on the trip to England, she took up law as she thought it was one of the few things one could do without attending classes. Rest is history.
5. As a member of Justice Verma Committee, set up after the brutal gang-rape in Delhi in 2012, Justice Seth had contributed extensively in roadmap for overall of criminal laws and steps to keep women safe.
6. Not bogged down by her male coileagues, Justice Seth held her own refusing to do just women's cases. Instead, she chose to compete with them taking up tax matters, constitutional law and criminal cases.
7. Champion of women’s rights, the wellknown judge was responsible her amendments to Hindu succession act giving equal rights to daughters in joint family property.
8. Her younger son is celebrated author and activist Vikram Seth.
9. The literacy bug beat her too. The former judge herself penned down three books. Starting with ‘On Balance’, her autobiography in 2003. She went on to write ‘We the Children of India’ in 2010, a book explaining Constitution to the country children. This was followed by ‘Talking of Justice: People's Rights in Modern India’ in 2014.
10. Justice Seth is revered as a strong supporter of the guy rights movement. Her disapproval of section 377 is known to the world as is her belief that ‘guy child needs more love’.

LIVING WITH DOCTOR GOOGLE

Vaishnavi Donekar, 12th class

Recently, I had three patients telling me, they had adult attention deficit disorder (Adult ADD). All of them came to this conclusion after a Google search and free online tests. One of them even tried alternative medicines, also obtained online. Different psychiatric disorders often present themselves with similar symptoms. Why each of those three patients had different problems: depression, vitamin B12 deficiency and post traumatic stress disorder. No adult ADD. Another one was Rekha, who noticed a delicate tremor in her hand one night. The 40 years old marketing executive spent the next few hours searching possible cases online. Finally, convinced tremors were the first sign of Parkinson’s disease. She went to see a doctor who opined that it could just be due to stress. He ordered a thyroid test and a few days of rest. Now, with more time to dwell on her symptoms, Rekha obsessively sought out more online information. The doctor sent her to a neurologist who in turn advised psychiatric therapy for anxiety, something Rekha had never thought of.

ELIZA BETHAN ERA

Piyasi Chakraborty, 11th std

The Elizabethan era saw the flowering of poetry, (the sonnets, the Spenserian stanza, and dramatic blank verse) was a golden age of drama especially for the plays of Shakespeare. Elizabethan literature, body of works written during the reign of Elizabeth first of England (1558 -1603), probably the most splendid age in the history of English literature, during which such literature writers as Richard Hooker, Christopher Marlowe, Edmund Spenser and William Shakespeare created some of their best works. Elizabethan is merely a chronological reference and does not describe any special characteristic of the writing.

WILLIAM SHAKESPEARE

William Shakespeare was a renowned English poet, play writer and an actor. He is widely regarded as the greatest writer in the English literature/language and the world's greatest dramatist. He was born on 26th April 1564 in Stratford-upon-Avon, a town in England. His father was a businessman. He spent most of his life in London writing and performing in his plays. He wrote near about 38 plays, 154 sonnets, two long narrative poems and few other verses. His plays and dramas have been translated into every major language and are performed more often than any other playright. His early plays were mainly comedies and histories.

WILLIAM SHAKESPEARE'S BEST WORKS.

The Merchant of Venice- It was written in 1596. It's all about troubles and complexes, it's proven endlessly malleble as a comment on Christian troubled relationship with its population and Porsia is one of the world's great female literary characters

Romeo and Juliet- It was written in 1594. It is about the children of mortal enemies fall for each other. It is a love story.

Twelfth Night - It was written in 1599. It is about the big, grown up comedy about identity and lost love.

BEST OF KNOWN STAGE PERFORMANCES

William Shakespeare's plays have been staged since the end of the 16th century. While Shakespeare was alive, many of his greatest plays were performed by the Lord Chamberlain's Men and Kings Men acting companies at the Globe and Black Friars Theatres. One of his best theatre was “The Globe’ which became the playhouse in 1599.

FAMOUS QUOTES OF WILLIAM SHAKESPEARE.

*Love all, trust few, do wrong to none.
*Go wisely and slowly, who rush, stumble and fall.
*Be not afraid of greatness. Some are born great, some achieve greatness, and others have greatness thrust upon them.
CELL PHONES IN OUR SCHOOL

Ankita Bansode 10th STD

When you were a kid, did you ever have to call your mother, and the school would not let you? Kids today still have to call their mother sometimes. But the school won't let them. Schools become much stricter about the phones even when it's an emergency sometimes. So that's why it would be a great thing, if schools would let us carry cell phones in school.

Cell phones have been an issue in schools ever since they become a big thing amongst teenagers. Sixth grader Amber H says' There could be an emergency that no one knows about and there might not be time to reach a phone!” In lot of schools, teachers take it too far. They take students' cell phones even when they aren't using them. They are turned off and hidden so that they don't disturb anybody. Teachers should not be allowed to take cell phones when they are not even bothering anyone. They are put on silent and they are hidden from other classmates! Just two years ago in October, a girl took the case to the Supreme Court. She had her cell phone taken away. It was in the backpack, turned off, not disturbing anyone. when the teacher saw it, took it away and she never had returned to her!

“I wasn't even using it and the teacher saw it in my backpack and confiscated it!” I tried to explain. I had to have it for later that day when my practice was over but she would not listen! So many students bring their cellphones to school for reasons like that!

Imagine this ....... you live in Lower Manhatton and your child goes to school nearby. It's a September 11 2001. You are working quietly and suddenly you hear a loud bang and lookout your window to see the north tower of the twin towers in flames! At your child’s school they speak, “Students, get out your cell phones and the Principal's voice blares over, call your parents immediately! They could use the school phones but there was a long line to use the phones. The first person finds out the lines are dead. Sure, they could use the cellphones that the very few students had brought to school. But so many students using 5 or 6 cell phones, would not you think that the battery would die out?” How would a child reach their parents to tell them that they are ok? They can't.

In emergencies like it is very important to have a way for a child to reach their parents! Sixth grader Mimi W. Says, “We need them in school because if there is an emergency and we could not use the school phones for one reason or another we could pull out cell phones!
THE HAPPIEST DAYS OF MY LIFE

AMISH SUTHAR XII STD

There is hardly any living being who has never gone through ups and downs in his life. Life is full of incidents of goods and bads. Some of them may be forgotten with the passage of time whereas others leave an everlasting imprint on the mind.

(Just like that I would like to share my happiest days of my life.)

During my school life of 10th standard, when all students were stressed and depressed due to studies and the different atmosphere surrounding them. Then came the flashing news that really relieved and excited all the students of my school. The news was that our school was taking us out for a camp. For a few seconds everything paused and we all starting imagining the camp.

Days passed like hours, finally that day arrived for what we all were excited for. We went to school with a bag that was bigger than ourselves. After sometime we got into the bus and started doing dance, music etc. After a long drive, we reached our destination. It was a cool place between forests, away from the digital world and filled with happiness. We had our breakfasts and a meeting. After that, real game started. Adventure sports which included rappelling, Rock Climbing, Zipline etc. We all did these sports with the competitive mind. We were divided into teams. Time passed. We got a break, had a lunch but continued playing till all the sports got over. From there on, we were tired; therefore they arranged mind games, treasure hunter games which didn’t require lots of energy. Thereafter, we had to go to the forest just like forest tour. Then after, we had our dinner and went for night exploration.

New day with lot of excitement started with exercises, Cardio and yoga etc. We went for swimming in Nature’s Pool known as Lake. We had lot of fun playing in water, far from our exam pressure; it felt, we became senior KG students. We had a small function in the evening where everyone had to participate. So we were working on that. Function started with the speech, filled with emotions and then came dance, drama, music etc. Programs ended peacefully but it was over time to leave from the camp.

We were sad; this camp taught us a lot of things. Overcome fear and keep on working which motivated us to study for Board. This was the happiest period of my life.

THOUGHT

Manish Chaudhary, 10th class

I have always loved The first day of School better than The last day of School.
First are best
Because they Are beginnings.
Freed
Nemat 11th std

Chains held tight
Friends went quiet....
Breeze blew cold,
Seeing it crawl.....
It was all ashes before it thought it could have it.....
Waters kept it drowned,
No help got around....
The shore was so apart,
Waves pushed it so far......
Shadows left its side even reflections started to hide......
Agony it was, that proved it all wrong......
After a long wait, little hope prevailed.....
It’s a little mirror in which,
Its wings were very clear......
It doubted its kind, now all fears were denied !....
Now no chains got hold of it!
No breeze felt cold !
No waters could drown !
It got freed from its thoughts,
So it sailed over them all!

FACTS ABOUT MATHS
Deep Dabhade 9th standard

1. In a room of 23 people, there is a 50% chance that two people have the same birthday.
2. Most mathematical symbols weren’t invented until 16th century. Before that, equations were written in words.
3. FORTY is the only number that is spelt with letters arrange in alphabetical order.
4. Conversely ONE is the only number that is spelt with letters arrange in in descending order.
5. From 0 to 1000, the only number that has the letter “a” in it is 1000.
6. ‘Four” is the only number in the English language that is spelt with the same number of letters are the number itself.

DIRECT TAX COLLECTION FACT
Akanksha Sonkamble

If the total direct tax collected in India would be Rs.100, how much would each state contribute?

AP Rs 4.5, Ben Rs 4, TN Rs 6.7
Del Rs. 13.7
MS Rs 38, others Rs.13.4, Guj Rs.4.6

Ans- Total direct tax collected from 2014 to 2019 in India: 50.67 Lakh crores. Just by five states: Maharashtra, Karnataka, Tamil Nadu, and Gujarat contribute 72% of the total direct tax collected in India.

BODIES OF WATER
Bhumi Thorat, 8th STD

Bodies of water I know them all,
Bodies of water some large and small,
The beautiful Blue Ocean so salty and blue
Covers most of our Earth three fourth, it’s true!
Near an ocean may be, a bit of sea to play,
Trapped by land it is called the bay,
Rivers - flowing large and long,
Streams are smaller and not as strong,
Fish love the lakes and boats do too.
Surrounded by water it is the lies a pool
Smaller than a lake is the little bitty pond,
You can fish on a pond and play all day long,
The waterfall so beautiful and nice,
And the glacier is amazing with streams of slow moving ice!

SAVE WATER SAVE LIFE
कोरोना महामारी चुनौतियां और सीख

अव्वेल वांछित टीमीज़ी

प्रकाशित:
दिसंबर 2021 में चीन की बुनाइन शहर में कोरोना नामक एक नई बीमारी ने कहर बरपाना शुरू किया। यहूदी है, वह बीमारी के लिए विश्व के अधिकांश देशों में फैल गई। प्रत्येक द्वितीय दिन देश की महामारी की संख्या में लोग बढ़ रहे थे। इसकी महामारी की दृष्टि से 16 ग्रुप, 2020 का विश्व स्वास्थ्य संगठन (WHO) ने उसे अंतर्राष्ट्रीय महामारी घोषित कर दिया। इस बारे में बांटने के लिए अधिकांश देशों ने अपने यहां संपूर्ण ताल मामलों का रेपोर्ट दिया और अनुमान सारी दुनिया एक साथ "अपने घरों में की गई।"

"देशों चीन ने जैसे कोई खिया है जैसे अभाविक आत्मघात, देशों पूरी दुनिया कैसी लगी है रोकने इसका संक्रमण"

इतिहास महामारी का:
वर्तमान इतिहास में होटर है कि विश्व में हर 100 वर्षों के बाद किसी न किसी महामारी का हालाल हुआ है, जैसे रूस 1920; रूस 1930; रूस 1950; रूस 1960; और एआई 2030 में कोरोना महामारी का प्रकाश लगाया है" विश्व में महामारी का प्रकाश हर 100 वर्ष आया, कमी प्लेग, कभी है। कभी करोना ने जबाकर गया।

संक्रमण/रोग:
कोरोना (कोरोना-19) एक ऐसे परिवार के फैलाव का वादा है जो आर एनआई (RNA) के लुप्तिकेत गर्तिधारण के सब है। उसके ऊपर वज़ाकियोंदेशों का प्रति ने फैल गई है। इससे बढ़ते बारे उपरिनिकाल होता है। इस विश्व में संक्रामण के जुड़कार, जीवंत, मर्यादा में बाराक और चार तरीके में जीवन देता है। जो तीन संक्रामण के फैल कर स्वास्थ्य की जान लेता है। जो लोग संक्रामण दरा से जमलें है उन्हें बीमारी प्रभाव अनेक बड़े विक्रेता पानी जाती है जैसे छून गाया, ओव्वे में संक्रमण घटक, मानसिक अरणाक्षण।

सरकारी रूपया और यथानामक अब तक:
1) भारत में 30 जनवरी 2020 को कर्तव्रत विपुल में पहला करोना ने नेपेट दर्ज किया गया।
2) 25.25 फरवरी 2020 को "करोना हंग" धर्मसंदर और अंतर्राष्ट्रीय कार्यक्रम अंतर्राष्ट्रीय लाभों का कार्यक्रम देखा गया।
3) मार्च 11, 2020 विश्व स्वास्थ्य संगठन द्वारा करोना का वार्तिक विश्व धारा को संभालित किया।
4) मार्च 32, 2020 कैनाडा आरोग्य मंत्री द्वारा पंजीकरण परिषद में करोना से दर्ज कर का आवश्यकता नहीं है, यह शरण प्रशासन हुआ।
5) मार्च 16, 2020 को व्यवहार कन्ट्रोल नेट ने नहीं कहा "देश एक बहुकर्म आर्थिक संकट की ओर बदल रहा है!"
6) मार्च 28, 2020 राजस्थान विभाग में समाप्ति वेय विकसता नयां से "समाप्ति कोई भी विना ग्रामिक प्राविकता राजस्थान में ना आए", इस व्यवंशी दी।
7) मार्च 11, 2020 कर्नाटक कॉन्ट्रोल दिवस के दिन पुरू देश में ताजा खुश किया गया।
8) सरकारी ती कर ताली विभागों, धारा विभागों का आयोजन और प्रतिलिपि दी गई।
9) मार्च 14 2020: पुरू भारत में अदालत से कोई पूर्व सूचना दिया वोर लॉकडाउन योगिता हुआ।
10) मार्च 32 2020 लोगों लंबाई में देश का शहीद होने से आपने नागार्ड विधान शासन शुरू हुआ।
11) दिनों में आर्थिक गर्भ में तालीनी समुदाय के लगो का सुनप श्रद्धा योगिता।
12) पी.बी. बैंकर कंट्रोल में दजारी करोड़ के लिए राष्ट्रीय रचना की गई जो "आर्टिसिअट लेंड के बाहर रही गई।
13) अगस्त 5, 2020 भारत में कुल केंड्रा 4.06.99 तक पुल गई और कुल सेक्टर की गैल कर हो गई।
14) अगस्त 30, 2020: अर्थव्यवस्था में श्री प्रसो रांग कार्टिका का विश्वास खारिज संध्या हुआ।
15) अगस्त 30, 2020: कार्टिका हुआ में गुलाब वैक्सिन की घोषणा हुई।

58 School Magazine - 2021-22
19) 28 अक्टूबर 2020 तक 1, 20,526 भारतीयों की गौर।
20) जनवरी 16, 2021 पहली कैसरीन दिवसी (एमए) में दिया गया।
21) फरवरी 19 2021: बाबा रामदेव द्वारा करोंडल द्वारा की योजना, वर्तमान स्वास्थ्य मंत्री की उपस्थिति
22) फरवरी 2021 प्रधानमंत्री द्वारा करार दिया पर जीत की योजना।
23) अगस्त 10 2021: नामा जुलू में कुंभ मेला आयोजित। 10 इज़र लोगों के लिए स्थान।
24) अगस्त 16, 2021 हेप्से जेडीजे फ्रीज डरोआ गुणगलण में सहारा तक वाली गई।
25) जून 2021: 4, 00,000 करोंडल से संभाल। नौसिखिया तक में आया।
26) जून 2021: 4, 00,000 करोंडल से संभाल। नौसिखिया तक में आया।
27) 6 सितंबर 2021 आज का दिन 38.948 नए केसेस 3 करेंड 30 लाख अबतक, 4. 41,000
28) 7 फरवरी 2021 तक इन गौर के अनुसार रही।

महामारी के जुनाहियाँ-

1. अर्थव्यवस्था का क्षति -

2. सामाजिक जीवन पर असर -

3. शारीरिक स्वास्थ्य संबंधी समस्याएं -

4. सामाजिक स्वास्थ्य संबंधी सुविधाएं -

5. सामाजिक सुरक्षा -

6. ऑनलाइन प्रकार -

7. क्रियापीका पर असर -

School Magazine - 2021-22
मानसिक स्वास्थ्य -
अनेक परिवारों को चुनने के सदों की वजह से लोगों की मानसिक स्वास्थ्य पर बुरा असर हुआ है। यहिं, नींद की कमी और सुरक्षा दर से साइकोसॅमिकल रोगों के बढ़ोतरी हुई है। वजह यह है कि मानसिक स्वास्थ्य बिना कर वह आक्रामक या उदरसीन हो गई है। महिलाओं प्रति वर्तमान हिसा में बढ़ोतरी हुई है।

कोरोना महामारी से सीख -
जैसे कि कोरोना का हर लोग हमें कुछ सिखाता है, इस कोरोना का लोग भी हमें कुछ सिखाता है। केवल रहने की तकलीफ़ जानकारी की, शायद अब इंसान समझ सकता है। कहीं नहीं तो, पूरी गोलियों फर आती है।
तो कहीं कुछ नहीं, अपने जीवन को भी तुम्हारा है। कहीं कई समय के लिए, कहीं नहीं तो, मोहल्ले ने दुनाम में हाथ उठवाया है।
तो कहीं गाइंधी भरकर, बुधवार काम करना बदलता है।
कहीं गतिर, कहीं ठाटाट, कहीं शक्ति का नाद बुनाया है।
ऐसे ही हमने देखा है।
कोरोना तीरों का हमें सिखाता है।
अंधकार में प्रकाश के लिए, हमने मार्ग जाना है।
शृंखला तक गुजर जाए, यही हमने जाना है।
इस काल में लोगों के, भारतीय संस्कृति को जनाए,
हैडशेक्स और आर्किटेक्चर छोड़,
नहीं चुका का अपना है।
रिश्तों में दूरी नहीं बताया,
रिश्तों को दूरी से निबाहित करें।
हां, ऐसी देख हमने अपनी को संक्रमित होने से बचाया है।
लोगों में अंतरिमत बचाने,
अब आनोंक काम करें।
अब और भी सावधानी बताए, क्योंकि संक्रमण का खतरा है।
मिलें, तुजही का जाना पीकर,
योग को अपना है।
प्रशासनिक क्षमता बढ़ा,
महामारी से उसी ने पार गया है।
इस संकट काल में,
निवेश और दिल्लियों आया है।
सामाजिक संवाद दें जिया,
यही हमारी संस्कृति ने सिखाया है।
WHY STUDENTS PLAY SPORTS

Rohit Nijwala 9th Std

Sports bring discipline in life. It teaches us the way of sitting, talking, walking etc. Without sports, human life seems too bored. Sports activate all the cells of body and keep them active. It keeps the body fit and slim. Sports improve thinking ability and reduce stress of mind. In fact, playing sports help students relax and reduce their anxieties. Besides, just being fun, sports can help you perform better in school, relax more and worry less. It deals with setbacks; works better with other and increase your energy. All of which help you balance school and everything else going on in your life.

Think it over

1. Be generous in complimenting others. The secret of happiness is to make others believe that they are the cause of it.

2. Chance usually plays a leading role in the drama of life.

3. Good friends are like stars. You don’t always see them, but you know they are there.

4. Freedom practices its own logic. It puts a bouquet of rights in your right hand and a basket of duties in your left hand. This is merely to help you walk straight.

5. The only disability in life is a bad attitude.

6. Owning things is human: sharing them is divine.

7. People don’t notice goodness because it is transparent like water and air: only if it runs out then it becomes noticeable.

8. He who struggles is better than he who never attempts.

9. All work is dignified: there is no such thing as ‘menial work’.

10. War is the greatest plague that can afflict humanity: it destroys religion, it destroys states, it destroys families.

11. Not winning but participation is important.

12. If wealth is lost, nothing is lost: if health is lost something is lost, but if character is lost, everything is lost.
